

Automotive Used Mini EV Cars Electric Vehicles Geely Panda For Adult

Our Product Introduction

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: CHETIANXIA
- Model Number: Geely Panda
- Price: \$2,931.00/pieces 1-9 pieces
- Packaging Details: 1
- Delivery Time: 30
- Payment Terms: T/T
- Supply Ability: 100 Piece/Pieces per Month

Product Specification

- Product Name: Electric Car
- Color: Optional
- Body Structure: 3-door 4-seat
- Max Speed: 100km/h
- Charging Time: 0.67 Hour Fast
- Battery Type: Lithium Iron Phosphate Battery
- Length * Width * Height: 3200x1670x1550mm
- Level: Mini Car
- Port: Khorgos
- Highlight: automotive mini ev cars , used mini ev cars , used mini cars electric

The 200km version of the Panda Mini is equipped with a 22kW DC fast charging function. At room temperature, it only takes half an hour to complete the charging process from 30% to 80%, while it only takes 68 minutes to fully charge from 5%, which is about a cup of coffee. This greatly solves electricity anxiety and expands the driving radius.

The appearance of the Panda Mini is square and square, with a closed front face and round headlights. It is small and cute, and offers many color options to choose from. It is still a "killer weapon" for girls who are "beauty conscious".

The Panda Mini is also equipped with electronic central locking, adjustable headlight height, reverse imaging, rear reverse radar, remote control, and other practical features that can enhance the driving experience. In addition, the car

comes standard with EPS+ABS+EBD in terms of safety configuration, as well as a rare panoramic sunroof in its class, with a size of 64 inches.

The Panda Mini adopts a sensorless start mode. By pressing and holding the brake and shifting to D gear, the vehicle can start and depart. In fact, it is a very easy to get started type, with a very light and fast start, a responsive power response, and no feeling of drifting when driving at 60 or 70 km/h. The stability is worthy of recognition. Of course, for such a micro pure electric vehicle, we definitely cannot demand how strong its power output can be, after all, the main applicable road section is still mainly for urban commuting.
