Max Speed	100km/h
Body Structure	5-door 4-seater Car

Range	200KM
Charging Time	8H
L*W*H(mm)	3950x1708x1580
Maximum power	50KW
Maximum torque	203N.m

In terms of suspension, a combination of front MacPherson independent suspension and rear multi link independent suspension is adopted. Based on our previous test drive of the MINI EV Intelligent Electric iDD, we adopted a sporty tuning style, bringing solid and agile driving performance. At the same time, the chassis is equipped with power batteries and necessary battery brackets in the middle, so the entire chassis brings a stable and compact driving feel.

In terms of interior design, it can be seen that the entire interior adopts sharp angular design elements, with a prominent center console design. Details such as the cockpit style gear lever area, three spoke steering wheel, and through air vents enhance the overall texture. At the same time, the entire center console is tilted towards the driver's side, which not only enhances convenience but also brings a good visual aesthetic.

In terms of power, it is equipped with a Blue Whale dedicated turbocharged engine, with a maximum horsepower of 170Ps and a maximum torque of 260N • m. With the assistance of an electric motor, the system's comprehensive maximum torque reaches 590N • m. It is matched with a 6-speed three clutch electric drive transmission, which takes only 6.5 seconds to break 0-100km/h.
