## Product Description

New Energy VW ID4 Crozz Prime Electric Car Used Pure SUV For Volkswagen

The VW ID.4 is an all-electric compact SUV that represents Volkswagen's commitment to electric mobility. It features a modern and sleek design with a spacious interior and advanced technology features. The ID.4 is built on Volkswagen's modular electric drive matrix (MEB) platform, specifically designed for electric vehicles.

The ID.4 Crozz is a variant of the ID.4 that was showcased as a concept vehicle. It features a coupe-like design with sloping roofline and sportier styling elements. However, it's worth noting that the ID.4 Crozz may have different specifications and features compared to the production version of the ID.4.

Both the VW ID.4 and the ID.4 Crozz are equipped with an electric motor and a battery pack for propulsion, offering zero-emission driving and benefits such as instant torque and quiet operation. The specific powertrain, battery capacity, and range may vary depending on the model, trim level, and regional availability.

For the most accurate and up-to-date information on the VW ID.4 and its variants, including the ID.4 Crozz Pro if available, I recommend visiting Volkswagen's official website or contacting a Volkswagen dealership. They can provide you with detailed specifications, features, and availability of the specific ID.4 models in your region.

## Product Description

**The ID.family is growing;a new concept car shows the electrice full-size suv of the future in shanghai.**

The Volkswagen brand celebrates the world premiere of the ID.car at auto shanghai, one of china biggest car shows.
