

Safety Changan Used Car Medium Level EV 4wd Electric Car Vehicles

Our Product Introduction

Basic Information

- Place of Origin: Guangdong, China
- Brand Name: Changan
- Model Number: Changan Uni K
- Minimum Order Quantity: 1
- Price: \$24,900.00/pieces 1-2 pieces
- Packaging Details: 1
- Delivery Time: 30
- Payment Terms: T/T
- Supply Ability: 100 Piece/Pieces per Month

Product Specification

- Product Name: Electric Car
- Color: Optional
- Body Structure: 5-door 5-seat SUV
- Max Speed: 200 Km/h
- Energy Type: Battery Electric Vehicle
- Charging Time: 6-8 Hours
- Level: Medium Vehicles
- Length * Width * Height: 4865x1948x1690mm
- Port: Shenzhen
- Highlight: ev 4wd electric car, changan used car medium, safety changan used car

Product Description

China New Energy Vehicles Changan Uni K EV Electric Car 4 Wheel 4wd Cars

The Changan Uni K EV is an electric car produced by the Chinese automaker Changan Automobile. The Uni K EV has a sleek and modern design with a sloping roofline, LED headlights, and a large grille. It measures 4,190 mm in length, 1,750 mm in width, and 1,600 mm in height.

Interior: The interior of the Uni K EV is spacious and comfortable, with seating for five people. It features a touchscreen infotainment system with a 10.1-inch display, Apple CarPlay and Android Auto compatibility, and a 12-speaker sound system.

Powertrain: The Uni K EV is powered by a 100 kW electric motor that produces 220 Nm of torque. It has a total system output of 160 kW and a range of up to 430 km on a single charge.

Battery: The Uni K EV uses a 55.5 kWh lithium-ion battery pack that can be charged to 80% in just 45 minutes using a fast charger.

Safety: The Uni K EV has a number of safety features, including seven airbags, anti-lock brakes, and electronic stability control. It also has a 360-degree camera system and a blind-spot monitoring system.

Electric consumption	18.8kwh/100km
Seat	5
Battery capacity	30.74kWh
Driving way	FWD
tyre	255/50 R20
Open roof	Yes
Seat	leathe

Blue Whale NE15T hybrid dedicated engine, eliminating front-end gear trains and adopting Miller cycle technology to ensure efficiency

Large capacity PHEV batteries bring more possibilities for travel

The load-bearing body structure, with the body components carrying the substrate, namely the body shell, is designed in an integrated manner, with stronger integrity and both external protection and load-bearing functions. It uses fewer materials for manufacturing, has better stability, and can effectively reduce the weight of the body. It is the design type used in most styles.

The positioning of a medium-sized SUV is that the front part of the car is slightly thicker and the downward pressure is lighter, which is a relatively labeled urban SUV image. The front grille adopts a matrix arrangement style, with a block structure distribution, relatively dense from both sides to the center, gradually expanding from each other, and the size of the block structure continues to shrink, giving a stronger sense of progression.
