Blue Whale NE15T hybrid dedicated engine, eliminating front-end gear trains and adopting Miller cycle technology to ensure efficiency

Large capacity PHEV batteries bring more possibilities for travel

The load-bearing body structure, with the body components carrying the substrate, namely the body shell, is designed in an integrated manner, with stronger integrity and both external protection and load-bearing functions. It uses fewer materials for manufacturing, has better stability, and can effectively reduce the weight of the body. It is the design type used in most styles.

The positioning of a medium-sized SUV is that the front part of the car is slightly thicker and the downward pressure is lighter, which is a relatively labeled urban SUV image. The front grille adopts a matrix arrangement style, with a block structure distribution, relatively dense from both sides to the center, gradually expanding from each other, and the size of the block

from both sides to the center, gradually expanding from each other, and the size of the block structure continues to shrink, giving a stronger sense of progression.
