0-100km/h Acceleration time(s)	7.5	7.5	5.9	3.8

The interior layer continues to use classic pure black elements, but the changes in surface leather materials are still very attractive.

The seat design is quite exquisite, with leather material as standard and Alcantara material as an option. The surface leather surface is more high-end, and the leather material has good breathability

The rear tailgate has more diverse load-bearing functions, with an

electric design as the load-bearing base and added position memory function, which can be adjusted through the front screen operation.

The BYD Seal is a household and comfort oriented car model, so the overall focus of this model will also be on comfort, convenience, and practicality. Although it is a sedan, it can also pass through some unpaved roads.
