Product Description:

Electric EV Cars

Electric EV Cars are the latest innovation in the world of transportation. These cars are powered by electricity, making them zero-emission and environmentally friendly. With the increasing concern for the environment and the need to reduce our carbon footprint, Electric EV Cars are becoming more and more popular among consumers.

One of the key features of Electric EV Cars is their tire size. These cars are equipped with R18 tires, which are specifically designed to provide a smooth and efficient driving experience. The R18 tires are also durable and have a longer lifespan, making them a cost-effective choice for consumers.

Another important aspect of Electric EV Cars is their interior color. The dark interior color not only adds a touch of sophistication to the car, but also helps to reduce the glare from the sun and provide a more comfortable driving experience.

In addition, Electric EV Cars come with an advanced steering system. The electric steering system allows for a more responsive and effortless steering experience, making driving these cars a breeze.

These cars are also equipped with a port located in Khorgos, which is a major hub for international trade and transportation. This makes it convenient for consumers to access their Electric EV Cars and also provides easy access for maintenance and repairs.

One of the main selling points of Electric EV Cars is that they are new. This means that they are equipped with the latest technology and have not been previously used, providing consumers with a fresh and reliable option for their transportation needs.

Electric EV Cars are not only a smart choice for the environment, but also for consumers. With their electric drive system, these cars offer a quieter and smoother ride compared to traditional gasoline-powered cars. They also have lower running costs, as electricity is generally cheaper than gasoline.

In conclusion, Electric EV Cars offer a combination of eco-friendliness, advanced technology, and convenience. With their tire size, interior color, port location, new condition, and electric steering system, these cars are a top choice for those looking for an efficient and sustainable mode of transportation. Join the trend of electric powered cars and make a positive impact on the environment with Electric EV Cars.

Electric EV Cars - Mercedes Benz EQA 260

The Mercedes Benz EQA 260 is a revolutionary electric powered car that combines state-of-the-art technology with luxurious design. As part of Mercedes Benz's commitment to sustainable transportation and environmental protection, the EQA 260 is a zero-emission car that offers high performance, intelligent driving, and user-friendly features.

With its sleek and elegant design, the Mercedes Benz EQA 260 is suitable for various applications and scenarios. Whether you're commuting to work, running errands around town, or embarking on a road trip, the EQA 260 is the perfect companion for your everyday adventures.

Brand Name: Mercedes Benz

Mercedes Benz is a world-renowned luxury car brand known for its high-quality, innovative, and stylish vehicles. With over a century of experience in the automotive industry, Mercedes Benz continues to set the standard for excellence and continues to push the boundaries of technology and design.

Model Number: Mercedes Benz EQA 260

The Mercedes Benz EQA 260 is the latest addition to the brand's line of electric vehicles. With its sleek and aerodynamic design, the EQA 260 offers a range of impressive features and specifications.

Place of Origin: Shenzhen

The Mercedes Benz EQA 260 is proudly designed and manufactured in Shenzhen, China. Shenzhen is known as the "Silicon Valley of China" and is a hub for innovation and technology, making it the perfect location for producing cutting-edge electric cars like the EQA 260. Minimum Order Quantity: 1

Whether you're an individual looking for a personal electric car or a business in need of a fleet of eco-friendly vehicles, the Mercedes Benz EQA 260 has a minimum order quantity of just 1, making it accessible to everyone.

The Mercedes Benz EQA 260 is competitively priced at \$23,546, making it an affordable option for those looking to switch to electric-powered cars.

Delivery Time: 15 days

With a delivery time of just 15 days, the Mercedes Benz EQA 260 ensures a quick and efficient process from order to delivery. Payment Terms: T/T

The accepted payment terms for the Mercedes Benz EQA 260 is T/T (Telegraphic Transfer), a safe and secure method of payment for both the buyer and seller.

Supply Ability: 10

The Mercedes Benz EQA 260 has a supply ability of 10, meaning that 10 units can be produced and delivered within a specific time frame to meet the demands of customers.

Battery Capacity: 100 KWh

The Mercedes Benz EQA 260 is equipped with a powerful 100 kWh battery that provides long-lasting and reliable performance. With this

battery capacity, the EQA 260 has a range of up to 300 miles on a single charge.

Steering System: Electric

The EQA 260's electric steering system offers a smooth and responsive driving experience. It also allows for easy and precise control, making it perfect for navigating through busy city streets or winding country roads.

Rear Window: Electric

The rear window of the Mercedes Benz EQA 260 is electric, providing convenient and easy access to the trunk. With just a push of a button, the rear window opens, making it easy to load and unload items.

Forward Shift Number: 5

The EQA 260 comes with a 5-speed forward shift number, allowing for smooth and efficient gear shifting. This helps to enhance the driving experience and improve overall performance.

Size: 4463x1834x1619mm

With dimensions of 4463x1834x1619mm, the Mercedes Benz EQA 260 is a compact and versatile car that is easy to maneuver and park. Its size also makes it perfect for both city driving and longer trips.

Electric Powered Cars

The Mercedes Benz EQA 260 is an electric powered car, meaning it is powered by an electric motor instead of a traditional gasoline engine. This not only reduces carbon emissions but also offers a smoother and quieter driving experience.

Zero-Emission Cars

As a zero-emission car, the Mercedes Benz EQA 260 does not produce any harmful pollutants, making it an environmentally friendly choice. This helps to reduce air pollution and contribute to a cleaner and healthier planet.

High Performance

The Mercedes Benz EQA 260 is designed to provide high performance, offering a powerful and efficient driving experience. Its electric motor allows for instant torque, meaning it can accelerate quickly and smoothly.

Intelligent Driving

The EQA 260 comes with a range of intelligent driving features, such as lane keep assist, adaptive cruise control, and automatic emergency braking. These features help to improve safety, enhance the driving experience, and reduce driver fatigue. User-friendly

The Mercedes Benz EQA 260 is designed with the user in mind, making it easy and comfortable to drive. Its intuitive controls and advanced technology ensure a seamless and enjoyable driving experience.

Connected Technology

The EQA 260 comes equipped with connected technology, allowing for seamless integration with smartphones and other devices. This enables drivers to access navigation, music, and other features hands-free, making for a safer and more convenient driving experience. Experience the future of transportation with the Mercedes Benz EQA 260. Its combination of luxury, technology, and sustainability make it the perfect choice for any application and scenario. Get yours today and join the electric revolution.

Packing and Shipping:

Electric EV Cars

Packaging and Shipping

- 1. All Electric EV Cars are packaged in a sturdy and durable cardboard box to ensure safe delivery.
- 2. Each car is wrapped in protective foam and plastic to prevent any damage during transportation.
- 3. The packaging is designed to be compact and lightweight, reducing the carbon footprint during shipping.
- 4. Our shipping method includes both air and sea freight, depending on the destination and urgency of the order.
- 5. All packages are tracked and insured to provide peace of mind for our customers.
- 6. We offer international shipping to most countries, with the option for expedited delivery for an additional fee.
- 7. Our team carefully inspects each car before packaging to ensure that it meets our high-quality standards.
- 8. We also offer customization options for packaging, such as including custom branding or gift wrapping for special orders.
