

## Leather Seats Fully Electric SUV with Automatic Gear Box and 0.53hour Charging Time

Our Product Introduction

for more products please visit us on [evcar.cn](http://evcar.cn)

### Basic Information

- Place of Origin: Shenzhen
- Brand Name: Mercedes Benz
- Model Number: EQA 260
- Minimum Order Quantity: 1
- Price: 26501-28850
- Packaging Details: Normal
- Delivery Time: 15
- Payment Terms: T/T
- Supply Ability: 10

### Product Specification

- Air Conditioner: Automatic
- Transmission: Automatic
- Engine Type: Naturally Aspirated
- Energy Type: Extended Range
- Battery Type: Lithium Iron Phosphate Battery
- Availability: Currently Available
- Seating Capacity: 5
- Exterior Rearview Mirror: Electric Adjustment
- Highlight: **Leather Seats Fully Electric SUV ,  
0.53hour Charging Time SUV ,  
Automatic Gear Box SUV**

### Product Description:

Introducing the Mercedes-Benz EQA 260 - Pure EV SUV for a Sustainable Future

Looking ahead to 2025, Mercedes-Benz is set to launch their latest electric vehicle, the EQA 260. This sleek and stylish SUV is powered by pure electric energy, offering a sustainable mode of transportation that aligns with the growing need for eco-friendly travel options. The EQA 260 is a prime example of Mercedes-Benz's commitment to innovation and leading the way in the automotive industry. Designed with both luxury and functionality in mind, this electric car offers a smooth and efficient driving experience.

As more and more drivers make the switch to electric vehicles, the EQA 260 sets a new standard for what's possible in sustainable transportation. Consumers can expect a range of advanced features, from intelligent driver assistance systems to cutting-edge infotainment technologies.

Adopting a forward-thinking approach, Mercedes-Benz has prioritized a cleaner, more sustainable future without sacrificing the style or performance that their vehicles are known for.

## Products Description

## Features:

In the year 2025, Mercedes Benz will release a new model of electric cars that are designed to use new energy sources. The SUV model is named the "Mercedes Benz EQA 260 Electric Car," and it is a pure electric vehicle. This SUV is one of many Mercedes Benz models that are part of a greater initiative to reduce the environmental impact of their vehicles.

The EQA 260 Electric Car features innovative engineering and technology designed to deliver a 100% electric driving experience. As a result, it completely eliminates any carbon emissions that traditional gas-powered vehicles produce. This environmentally friendly SUV has an impressive range and performance capabilities that are sure to exceed the expectations of many drivers.

The Mercedes Benz EQA 260 Electric Car is a testament to the brand's commitment to sustainability and the environment. The company is working diligently to ensure that all of its future vehicles are designed to meet the growing demand for eco-friendly transportation. By providing drivers with advanced, sustainable technologies, Mercedes Benz is shaping a better future for the planet and for future generations.

### **Technical Parameters:**

In the year 2025, there will be an exciting addition to the world of automobiles: the new Mercedes Benz EQA 260 Electric Car. This SUV will be a pure EV, meaning that it will run entirely on electric power. This is part of the larger trend of creating new energy vehicles which can help reduce carbon emissions and mitigate the effects of climate change.

The Mercedes Benz EQA 260 Electric Car will be a major milestone in the automotive industry and a significant contribution to the growing demand for sustainable and eco-friendly automobiles. With its sleek design and advanced technology, it promises to provide an unforgettable driving experience while also being kind to the environment.

This innovation by Mercedes Benz is an important step towards creating a greener future with more sustainable transportation options. Drivers can feel confident that they are driving a vehicle that is not only stylish and cutting-edge, but one that is also doing its part to protect our planet.

Here are some key features of the Mercedes Benz EQA 260 Electric Car:

Pure EV, powered entirely by electric energy

Top-of-the-line technology for a seamless and comfortable driving experience

Stylish and sleek design that is sure to turn heads on the road

A commitment to sustainability and reducing carbon emissions

## Applications:

### Introduction

Mercedes Benz is set to release their new electric car, the EQA 260, in 2025. The Mercedes EQA 260 is a pure electric SUV, specifically designed to operate on electric power and reduce the carbon footprint that traditional gas-powered vehicles tend to have.

### New Energy Vehicles

The EQA 260 is part of the new generation of energy vehicles, which are powered by electricity rather than gasoline. The car's design and engineering were focused on reducing carbon emissions, making it an excellent eco-friendly option for car enthusiasts and eco-conscious buyers alike.

### Pure Electric SUV

The EQA 260 is a pure electric SUV, which means it does not use gasoline at all. The car's battery pack powers the electric motor, and the lack of gasoline combustion reduces emissions and contributes to a cleaner, greener environment.

### 2025 Release Date

The release date of the Mercedes EQA 260 is set for 2025, and it's an essential milestone for the brand on its way to becoming a leader in the electric car market. The release of this vehicle demonstrates Mercedes-Benz's commitment to the preservation and protection of the environment in the face of climate change.
