Products Description

Features:

China is now producing new energy vehicles that are hybrid, five-seaters, and capable of driving up to 160 kilometers at a time. One such vehicle is the BYD Song L DM-i EV electric car, which is a sleek and modern SUV designed for energy efficiency and reduced emissions. The BYD Song L DM-i EV is a perfect example of China's commitment to developing sustainable transportation options for its citizens. This electric car is powered by a set of electric motors that can be charged at home or at any of China's growing network of electric vehicle charging stations. Capacities vary, but most drivers can expect to get around 160 kilometers of driving distance on a single charge, making this car an ideal choice for local commutes or short road trips.

Not only is the BYD Song L DM-i EV electric car great for the environment, but it's also stylish and convenient. This SUV boasts plenty of legroom and comfortable seating for up to five passengers, and has plenty of cargo space for your belongings. Additionally, features like a rear camera, multimedia display, and advanced safety systems make it a great choice for families looking for a reliable and eco-friendly vehicle.

BYD Song L DM-i EV Electric Car Specs:

Hybrid electric vehicle

5 seater capacity

160 kilometers driving range

SUV style and design

Advanced safety features

Rear camera and multimedia display

Technical Parameters:

The BYD Song L DM-i EV Electric Car is a hybrid 5-seat SUV from China's new energy vehicles market. It has a range of 160KM and is a great representation of China's push towards sustainable transportation solutions.

Applications:

BYD has recently announced the release of their latest electric car model in China, the "Song L DM-i EV" which is a 5-seat hybrid SUV with a range of 160KM. The car is a new energy vehicle that represents BYD's continued commitment to building sustainable transportation options.

This latest model uses electric power combined with a traditional internal combustion engine to provide both a powerful and efficient driving experience. This combination makes the "Song L DM-i EV" an ideal choice for drivers who want to make the switch to electric vehicles but still have concerns about range anxiety. With a 160KM range on a single charge, drivers can enjoy a reliable and practical car without worrying about running out of power unexpectedly.

The exterior of the car is sleek and modern, featuring a streamlined design that emphasizes the car's electric power. The interior is spacious and comfortable, with plenty of room for passengers and cargo. The car is equipped with a range of advanced features and technologies, including a touch-screen infotainment system and smart safety features like lane departure warning and blind spot detection.

The "Song L DM-i EV" is a great example of BYD's commitment to creating sustainable and practical transportation options for drivers in China and around the world. With its hybrid power system, advanced features, and modern design, this electric SUV is sure to be a hit with drivers who are looking for a more sustainable and practical mode of transportation.

Packing and Shipping:

Product Packaging:

Our Electric EV Cars come securely packaged in a durable cardboard box that is designed to protect the car during shipping and handling. The box measures 50 x 30 x 20 inches and includes ample padding and cushioning to prevent any damage during transit. In addition, the box includes an instruction manual and all necessary cables and charging equipment.

Shipping:

Our Electric EV Cars are shipped via a reputable courier service and are usually delivered within 5 to 7 business days. Shipping costs will vary depending on the destination and size of the order, and customers will receive a tracking number once the order ships. For international orders, customers are responsible for any customs or import taxes that may apply.
